

I hereby request a key to the waste storage room 153 in the Biodiversity Centre. I have read over the safety material at:

Biological Waste: http://www.hse.ubc.ca/_shared/assets/Biological_Waste_Poster5187.pdf

Chemical Waste: http://www.hse.ubc.ca/_shared/assets/065355.pdf

Other: <http://www.hse.ubc.ca/safetyenvironment/hazardousmaterials/formspublications.html>

I understand that all material must be properly labeled and that placing unlabelled material in this room may result in my lab being unable to use this facility (Biology Stores will continue to take waste). Labels for biological waste may be picked up from Scott Usher in Stores. Labeled biological waste may then be stored in the freezer in room 153.

The form for chemical waste may be filled out at:

<http://www.hse.ubc.ca/safetyenvironment/hazardousmaterials/chemicalwastedisposal.html>

Whenever you notice that the facility is filling up, please contact Bang Dang <bang@interchange.ubc.ca> (604-822-1285) from Health, Safety and Environment to arrange a pickup.

I promise that I will abide by UBC's regulations on disposal of hazardous material and that I will never leave unlabelled or inappropriate hazardous material in room 153 (radioactive material is not allowed).

Sincerely,

_____ (Signature)

_____ (Printed name)

_____ (Lab affiliation)

_____ (Date)
